

## SPREAD ADHESIVE

### TRIFORT

Trifort is an anionic spreader adhesive with contact effect and wetting. It adheres to the leaf surface by mixing with the fertilizers and pesticides used on the leaf surface and increases its effectiveness for a longer time by providing maximum surface wettability.

### USAGE

IN VEGETABLE AND FRUIT/CITRUS GROVES	IN OPEN FIELD AND ORNAMENT PLANTS
White fly 200 cc/100 L in a mixture with .....	Leaves 150 cc / 100 L in a mixture with .....
Thrips 250 cc / 100 L in a mixture with .....	Thrips 250 cc / 100 L in a mixture with .....
Leaves 150 cc / 100 L in a mixture with .....	White fly 200 cc / 100 L in a mixture with ....
150 cc / 100 L in a mixture with other compounds .....	150 cc / 100 L in a mixture with other compounds .....
